NOTE—Contn. sheet.

Statement showing the opinions of the Dy. Comrs & Presidents

D.C. Bangalore Dt—

States that there is no objection to direct the Patels to report the outbreak & cases of fever & cough in a village in a spreading form.

D.C. Kolar Dt.

States that pneumonia may be included in the list of notifiable diseases, the same being very desirable in the interests of public health.

D.C. Tumkur Dt.

States that it is desirable to include Pneumonia also in the list of notifiable diseases mentioned in G.O. of 25-3-19.

D.C. Mysore Dt.

States that he does not approve of the proposal re inclusion of Pneumonia in the list of notifiable diseases.

Presdt, Mil Council, Bangalore Cit—

States that ~~in [illegible] Health~~ Pneumonia may be included in the list of notifiable diseases.

President, City Mil Council, Mysore.

States that even in the cases of definitely diagnosable diseases like Cholera, Plague & Small-pox, the rules regarding Notifn &c. are hardly appreciated & rarely practised & that it is yet to mature to multiply notifiable diseases.

Rul Councils of the Bangalore & Mysore Cities.

D.C. Hassan	D.C. Shimoga	D.C. Kadur	D.C. Chitaldrug
States that Influenza may be added on to the list instead of Pneumonia, as Influenza can be recognised ahead. Ache & cold & when Influenza is reported, Pneumonia can be searched for in the earlier stages. If Pneumonia only is to be reported, the report will come probably too late, in most cases, for preventive measures.	States that stray cases of pneumonia need not be reported, but if it shows signs of assuming a severe epidemic form, a report should be made immediately. The difficulty in making a prompt report is chiefly felt in rural parts whence it is difficult to get precise information as to whether a case is one of Pneumonia or not.	States that cases of pneumonia are of common occurrence in the Malnad and that as it rarely assumes an epidemic form there is no need to notify them.	States that Pneumonia may not be included among notifiable diseases as it is difficult to diagnose it in rural parts & even then such cases are fortunately rare.

Bringing to notice the difficulty in the matter of verifying causes of deaths from pneumonia and bronchitis.

22 JUN 1920

D.O. letter No. No. 2000 dated the 16th June 1920 from the Health Officer, Bangalore City to the Sanitary Commissioner with the Government of Mysore, Bangalore.

With reference to your D.O. letter No. 866-3 dated the 4th Instant asking me to ~~take~~ keep a careful watch on the reports of deaths returned as pneumonia and brochitis with a view to ascertain the true cause of mortality, I beg to state that there is practical difficulty in finding out cases of Pneumoia and Bronchitis while alive. As you know Sir, pneumonia & bronchitis do not fall under category of notifiable diseases. Even great many cases of the notifiable diseases such as plague, cholera, small-pox do not come under the observation of the Health Department during life. Such being the case it is difficult to find out by means of our staff cases like pneumonia and brochitis in life.

Under these circumstances I request you to write to the Government that it is not feasible to find out all cases of peumonia and bronchitis during life time. Noverthless efforts are being made to find out such cases and take needful action as suggested in D.O. quoted above.

Sd/- 11/8/20.
For Chief Secy.

10/8

Ber
10.8.20

According to the Rules at present in force for combating epidemics in rural as well as urban areas (as published in G.O. No. G. 21371-402 San. 101-17-12 dated 25th March 1919), prompt report of outbreaks of epidemics is insisted upon only in the case of diseases like Cholera, Small-pox and plague. In view of the ravages of influenza, it appears desirable to keep the officers of the Health Dept. informed of the occurrence of cases of Pneumonia also so that they might be in a position to diagnose the same by means of bacteriological examination if necessary and adopt prompt and necessary measures for preventing the spread of the disease.

C.S. Balasundaram Iyer, Esquire, B.A.,
Chief Secretary to the Government of His Highness
The Maharaja of Mysore, General and Revenue
Secretariat, B a n g a l o r e.

Sir,

With reference to your letter No.G. 4007-16/San.19th instant calling for my opinion re: the inclusion of Pneumonia in the list of notifiable diseases and the application of the rules issued in G.O.No.G. 21371--402/Sany. 101-17-12 dated 25th March 1919 to the said disease, when there are cases of fever and cough in a house or in the Town more or less in a spreading form, I have the honour to state that in my opinion this seems very desirable in the interests of public health.

The disease may be included in the list of notifiable diseases and the rules of 25th March 1919, made applicable to Pneumonia also.

I have the honour to be,
S i r,
Your most obedient servant,

For Deputy Commissioner,
Kolar District.

MYSORE.

To,

C. S. Balasundaram Iyer, Esq., B.A.,

Chief Secretary to the Government of

His Highness the Maharaja of Mysore.

SIR,

With reference to your letter No. 4007-16/San. dated the 19th August 1920, requesting my opinion as to whether pneumonia may not be included in the list of notifiable diseases and the rules issued for combating epidemics in rural as well as urban areas with the Government order No. G. 2137-1-402/Sany. 101-17-12 dated the 25th March 1919, I have the honour to state that the rules in question are applicable only to rural and urban areas other than City Municipalities.

I may however observe that there would not be the least objection to make pneumonia a notifiable disease in the Mysore City if only I could feel assured that such a measure would fulfil the object for which it is intended. But I am afraid in the present state of the Sanitary standard of our people, whatever rules may be made and published will remain only on paper and their working would not be practicable. It has been found by experience that even in the cases of definitely diagnosable diseases like Cholera, Plague, and Small-pox, the rules regarding notification etc., are hardly appreciated and rarely practised.

Considering all circumstances I should think it is yet too premature to multiply notifiable diseases.

I have the honour to be,

Sir,

Your most obedient servant,

President.

Office of the Deputy Commissioner,

Chitaldrug District.

Sir,

Adverting to your letter No.4007-16 San. dated 19th August 1920 calling for my opinion as to whether Pneumonia may not be included in the list of notifiable diseases etc., I have the honour to state that Pneumonia may not be in-cluded among notifiable diseases as it is difficult to diagnose it in rural parts and even then such cases are fortunately rare.

To

C.S.Balasundarum Iyer,Esquire.,B.A.,

Chief Secretary to the Government of

His Highness the Maharaja of Mysore,

B a n g a l o r e.

Sir,

With reference to your letter No:4007-16/San. dated 19th August 1920 calling for my opinion about including -- Pneumonia in the list of Notifiable diseases such as Plague Cholera,and Small-pox when it happens to be prevailing more or less in an epidemic form, I have the honour to state that I invited opinions of the principal officers of the District in the matter and most of them seem to be in favour of the inclusion of Pneumonia in the list as proposed.

2. The Amildar of Manjarabad points out that there is - some difficulty in finding out the nature of the disease as he understands that fever and cough in a mild and general - form is a passing indisposition with the people in the Malnad. The Amildar of Arakalgud and the Sub Division Officer, Saka--lespur, do not think it expedient to include Pneumonia as -- as they fear also that it is not easy of diagnosis like --- Cholera or Plague.

3. I would add Influenza instead of Pneumonia in the -- list. Influenza can be recognised by head-ache and cold --
